PROFESSIONAL OVERVIEW

I'm a self-taught Senior Full Stack Web Developer with an insatiable curiosity for cutting-edge tech. I thrive on challenges, turning complex problems into elegant, scalable solutions. Whether I'm coding solo, collaborating with a team, or leading a project, I adapt quickly and deliver results. I'm comfortable managing client relationships and coordinating with outside providers. My passion for blockchain and machine learning keeps me at the forefront of innovation. I'm not just a coder – I'm a problem solver who's always eager to learn and push boundaries.

WORK EXPERIENCE

Junior Developer

Freelance, Remote | 2015- 2021

- Developed diverse web and mobile apps using Java, PHP, JavaScript, and Python, tailoring tech stacks to project requirements.
- Crafted efficient automation scripts, streamlining workflows, and enhancing productivity.
- Mastered client communication, negotiations, and project/time management skills
- Acquired cybersecurity fundamentals, implementing best practices in application development.
- Continuously expanded technical expertise through personal projects and client work, staying current with emerging technologies.

Full-Stack Web Developer

“Profitus”, Vilnius - Remote | 2021-2022

- Maintained and enhanced existing platform, implementing new features as part of a small, agile team.
- Contributed to architecture design and development of a new platform, leveraging cloud infrastructure and single-page application (SPA) technologies.
- Utilized PHP, JavaScript, React, and MySQL to build robust, scalable web solutions.
- Collaborated on code reviews, ensuring high-quality, maintainable codebase.
- Participated daily, bi-weekly, and monthly stand-ups planning and presenting work progress.

Senior Software Engineer

Freelance, Remote | 2022 - Present

- Designed and implemented diverse software solutions for a long-term Estonian client, focusing on affiliate marketing and data analytics.
- Architected and developed internal software, landing pages, web scrapers, and SaaS products (e.g. “Searchfrom.com”) using cutting-edge technologies.
- Created ETL pipelines and custom analytics dashboards, including a bespoke solution based on “PostHog”.
- Managed DevOps processes using AWS and DigitalOcean, ensuring robust and scalable infrastructure.
- Implemented advanced ML solutions, including computer vision models (YOLO) and LLM-based RAG systems, while contributing to open-source projects.

SKILLS

- Communication
- Solo/Teamwork
- Team management
- Problem solving
- Adaptability

TECHNOLOGIES

- Python (Django, FastAPI)
- PHP (CakePHP, Laravel)
- Javascript/NodeJs (NextJs, React, jQuery, HTMX)
- CSS (SASS, Tailwind, Bootstrap, MaterialUI)
- DevOps (Docker, AWS, DigitalOcean)
- Machine Learning – AI (Ollama, OpenAI, Anthropic APIs, Langchain RAGs, agents)
- Cybersecurity (Vulnerability discovery, pentesting, patching, best practices)

CERTIFICATIONS

- Coursera Machine Learning
- Google Data Analytics
- Google IT automation with Python
- AWS Cloud Practitioner

INTERESTS & LANGUAGES

- Fluent in Lithuanian and English.
- Conversational Russian and Spanish.
- Passionate about homelab management, home automation exploration.
- Petrolhead and avid PC gamer.
